DETAILED ACTION

1. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

1. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 8, applicant describes squeezing and spreading apart the release member that nests in a locking position in clamp member 9. However, the only member that slots into the removable clamp is the end of rod 3, as seen in Figure 7, for example. Applicant does not describe any locking function and does not describe squeezing or spreading apart those ends of the rods to fit them in the clamp. From applicant's disclosure

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Baron (USPN 2,531,902).

Baron shows a quick release carrier 10 which is capable of being used to hold a doll seat. It includes a mounting clamp 17 removably attached to a bicycle frame

member 21. Quick release members (rod ends 25) nest in a fixed nesting position in the clamp member. The ends can be squeezed together or spread apart, as needed.

4. Claims 2 and 5-7 are allowed.

5. Applicant's arguments filed February 28, 2006 have been fully considered but they are not persuasive.

Applicant indicates that claim 8 has been amended to particularly point out and distinctly claim the invention. However, the combination now recited in claim 8 is not entirely consistent with applicant's disclosed invention. The disclosed invention includes a removable clamp 9 and ends of rods 3 that nest in the clamp. However, there is no disclosure of the bent ends of rods 3 being squeezed or spread to facilitate attachment or "locked" in place. Also, the Baron rods can be squeezed and spread, as broadly and functionally claimed, so the limitation is met by the prior art of record.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
